

PO BOX 8059 Santa Maria, CA 93455  
Sales Office: (805) 347-2709

***Thank you for your Original Santa Maria Style BBQ purchase!***

**BBQ Instructions**

OPTIONAL BEFORE YOU USE: Curing your grill protects the grill's interior and exterior finish and seals. This burns in the surfaces preventing unnatural flavors in your first meals. Please follow these steps in curing your BBQ grill.  
Lightly coat ALL INTERIOR SURFACES including GRILLS and GRATES. You may find the spray on type easier to apply.  
Build a medium-sized fire in the firebox suitable for the model BBQ you have.  
When the coals are glowing, spread them out with a fire poker. Heat should be at approximately 250° F for two hours.  
Re-coat GRATES with cooking oil and return to grill at approximately 200° F for two hours.  
Your BBQ will then be ready for use.

---

TO START FIRE - Stack wood/charcoal in a pyramid and saturate with lighter fluid (DON'T USE GASOLINE). Light coals in several places. After wood/charcoal turns to ash, or over 1/2 gray, spread them out and start cooking. ALWAYS FOLLOW CHARCOAL AND LIGHTER FLUID MANUFACTURERS' INSTRUCTIONS AND WARNINGS. USE OUTDOORS ONLY ON NONCOMBUSTIBLE SURFACE - 15' AWAY FROM WOOD AND COMBUSTIBLE MATERIAL.

Control heat with amount and type of FUEL & adjustable grill surface. Wood burns hotter than coals. Lowering the adjustable grill will cook food faster & causes more direct heat.

Ashes left in the FIREBOX too long hold moisture and rust through any thickness of steel, it is recommended that the remaining ashes are clean out after use. This BBQ is made of 10 gauge carbon steel, which WILL RUST, ESPECIALLY IF NOT PROPERLY CARED FOR. Burn lighter fluid completely before starting to cook.

After using, coat vegetable oil on interior grates and bare metal while warm to reduce rust. On the EXTERIOR, remove rust with wire brush and touch up with a high heat paint, available at most hardware/auto stores & also through Santa Maria BBQ Outfitters Sales Office.

---

NOTE: NEVER EXCEED 400° F BECAUSE THIS WILL DAMAGE THE FINISH AND CONTRIBUTE TO RUST. THE PAINT IS NOT WARRANTED AND WILL REQUIRE TOUCH-UP. THIS UNIT IS NOT WARRANTED AGAINST RUST SO KEEP THIS UNIT COVERED IF LEFT OUTDOORS AFTER USE.

**Warning: Keep children & small pets away from BBQ before, during, and after the fire is burning in BBQ. The BBQ will be hot for an extensive time after use. Always use caution during the use & moving our BBQ's. Always clean cooking & preparation surfaces after each use. Keep a defensive distance as per any fire codes between your BBQ & any other flammable materials. ALWAYS FOLLOW CHARCOAL AND LIGHTER FLUID MANUFACTURERS' INSTRUCTIONS AND WARNINGS. USE OUTDOORS ONLY ON NONCOMBUSTIBLE SURFACE - 15' AWAY FROM WOOD, COMBUSTIBLE MATERIAL AND STRUCTURES. ALWAYS KEEP BBQ OUT OF DIRECT OUTDOOR WEATHER TO PREVENT RUSTING.**

***We love to hear from you! Have any questions, please give us a call!***

**HAPPY GRILLING FROM ALL OF US AT  
SANTA MARIA BBQ OUTFITTERS!!**
